

Rainbow Spiral Recycling Scheme

Our Impact

9

times a PVC product can be recycled

50

million kgs of CO2 emissions avoided to date

For 25 years, Rainbow have been the **only tree guard manufacturer using 100% recycled materials**. This is estimated to save at least 2 million kgs of carbon every year, avoiding virgin plastics from entering the environment.

Rainbow is launching the Rainbow Recycling Scheme in **partnership with wholesalers and recycling partners** across the UK to recycle your old spirals. Join us in **collecting and recycling old spirals** and give PVC products up to 9 useful lives.

How to Participate

1 - Subscribe

- Estimated the number of bags required (600-700 spirals per bag; typically 7 plants per metre hedging)
- Order bags online through the Rainbow website or through your local wholesaler

2 - Remove

- Prepare to remove - see our removal recommendations
- Consider 20-25 min per 5 metre section

4 - Recycle

- Rainbow will handle the recycling. Products will be recycled into new spirals, PVC pipes or PVC window frames

3 - Collect

- Contact Rainbow or your wholesaler for collection. We will be back in touch with collection date
- Please see Q&A for more details

Cost

- £65 per bag ex-vat for minimum of 6 bags
- £50 per bag ex-vat for 15 bags or more

Other Considerations
